Student Name (2)	Kam Jia Sheng	Student ID (2)	242DT2429C
Student Name (3)	Teu Er Kang	Student ID (3)	242DT242CL
Programme	☐ Dip. IT		
Trimester/ Session	2610		
Project Leader's Email	LIM.LI.GUAN@student.mmu.edu.my		
Project Leader's Contact Number	011-26130408		

Selected Project Detail

Project Title	Integrated Vanue Rental and Penalty Management System
Overview	A specialized web-based platform for managing the reservation and maintenance of venue (e.g., discussion rooms, sports courts, and event halls). The system ensures conflict-free scheduling and introduces a post-usage assessment module to manage damage penalties.
Objectives	1. To automate the booking and scheduling process for various campus venues with real-time availability updates. 2. To implement a server-side time-slot validation logic to prevent overlapping reservations. 3. To implement a **Pre-booking Deposit System** to ensure financial accountability for campus venue usage. 4. To develop a **Post-Usage Inspection Module** that allows administrators to manually assess damages and record compensation fees. 5. To integrate an **Automated Settlement Logic** that deducts damages from the deposit and triggers notifications for outstanding balances if the deposit is insufficient.
Target Users	1. Students/Staff: Users who need to search, check availability, and book campus venues.

	2. Venue Administrators: Staff responsible for approving bookings, conducting post-usage inspections, and managing facility records.
Project Scope	1. User Module: Search venues by capacity/type, view interactive time-slot calendars, submit booking requests, and view penalty history . 2. Admin Module: Manage venue profiles (capacity, equipment inside), process booking approvals, conduct "Post-Usage Assessment" to input damage fees。 3. Technical Implementation: Hard-coded using native PHP and MySQL; utilizing Git for version control; strictly avoiding any banned code generators or CMS platforms
Supervisor	Ms. Tan Sin Yin
